

Module Title	Final Year Individual Project	
Prerequisite	COM3301 Research Methods for Computing	
Type/ Status	Compulsory Core Course Unit	
Module Code	COM4901	Credits: 9 (Project 900 hours)
Learning Outcomes	At the end of this module, the student should be able to: LO1 develop a project proposal to solve a problem in a relevant area/domain using knowledge and skills acquired in the academic program; LO2 identify ethical or professional issues relevant to the project topic; LO3 carry out literature survey related to the topic; LO4 develop a methodology to design and implement a solution; LO5 implement, test, evaluate and validate the solution / prototype; LO6 demonstrate oral and written communication skills in the preparation of prototypes, demos, and documentation that meet professional standards.	
Module Contents	Topics	LOs
	Introduction to research project, research concepts, identification of the problem and objectives, writing and presenting the project proposal	LO1
	Social, professional and ethical aspects of research	LO2
	Background study, literature review	LO3
	Developing the methodology, setting up the equipment, software and infrastructure	LO4
	Carrying out the research and development, testing and iterative improvement, experimentation, data collection, evaluation and validation	LO5
	Writing the project report, orally presenting and demonstrating the project to an audience	LO6
Resources	Multimedia projector, magi boards, marker pens, pictorial charts, posters, diagrams, DVD, internet, CD's, magazines and journals.	
Methods of Teaching and Learning	Group discussions, mentored supervision, research and advice sessions and supervised project sessions.	
Assessment	Continuous assessment and final examination. CA 40% + FE 60% = Z 100% (CA = Continuous Assessment, FE = Final Examination, Z = Total Marks) CA Proposal writing 15% Presenting the proposal 10% Interim Report 15% FE Submission of Final Report 30% Presentation and Demonstration of the Project 30%	
	Learning Outcomes	Assessment
	LO1, LO2	Proposal writing

		Presenting the proposal	
	LO3, LO4	Interim Report	
	LO5, LO6	Submission of Final Report, Presentation and Demonstration of the Project

Goal: Provide an opportunity for the student to design and conduct an independent piece of research or study related to the discipline/area/domain under the guidance of a supervisor in his/her final year of undergraduate study.

- Introduction to research project
- Research concepts
- Social, professional and ethical aspects of research
- Identification of the problem and objectives
- Writing and presenting the project proposal
- Background study
- Literature review
- Developing Methodology
- Setting up the equipment, software and infrastructure
- Carrying out research and development
- Testing and iterative improvement
- Experimentation, data collection, evaluation and validation
- Writing the Project Report
- Orally presenting and demonstrating the project to an audience
